TREND: Respecting a
tradition of innovation

TREND Group is firmly rooted in **Orsoni's** historical and cultural legacy: a tradition that has been passed down for generations and takes shape in its unique proposition.

With extensive experience in manufacturing, renovation and design industries, in 2000 **Pino Bisazza** and **Andrea Di Giuseppe** founded TREND Group. The company is a leading global producer of full body glass, gold mosaic and engineered agglomerate surfaces. In 2003, Orsoni Venezia 1888 joined TREND Group.

Orsoni is the last historical Furnace hidden in the heart of Venice that produces 24K gold leaf mosaics, colored golds and Venetian smalti - glass forged with colorants at high temperatures - in over 3.500 colors using the same artisanal techniques since 1888.

Aureo

The magical process of making 24K gold leaf surrounds the soul with magnificent beauty no other material can evoke.

Authentic 24K Gold Leaf

The authentic and unique 24K gold leaf is handmade with the same ancient goldbeating techniques. Each piece is uniquely crafted with an expert touch.

The legendary tradition of creating glass for mosaic.

Orsoni's precious gold mosaics and colored golds are made using traditional Byzantine techniques. The gold leaf is laid on a thin - transparent or colored - glass piece obtained from the "sbruffo", the iconic bubble-shaped glass handblown in the Furnace. A protective layer of transparent or colored molten glass is then poured on the gold leaf to preserve its eternal beauty.

Photo: Prism Consulting

All the different shades of Orsoni's golds are the result of the time-honored combination of glass and 24K gold, the most precious metal.

San Marco Gold

Since its beginning in 1888, Orsoni has supplied the mosaics for the renovation of the 8,000 m² of mosaic decorations in Venice's St. Mark's Basilica.

Orsoni is still today the only furnace capable of producing the unique San Marco Gold through a secret process that grants the tesserae their original "aged" look.

Royal Clock Tower Makkah, Saudi Arabia

In the monumental complex overlooking the Holy City of Makkah, the Royal Clock Tower dominates the landscape with a height of 601 meters, making it the tallest clock tower and the largest clock in the world.

40.000 m² of TREND glass mosaics were installed with the highest technological standards to decorate the building, of which 14.000 m² in 24K gold leaf, making it the largest ever work in terms of square footage of applied gold.

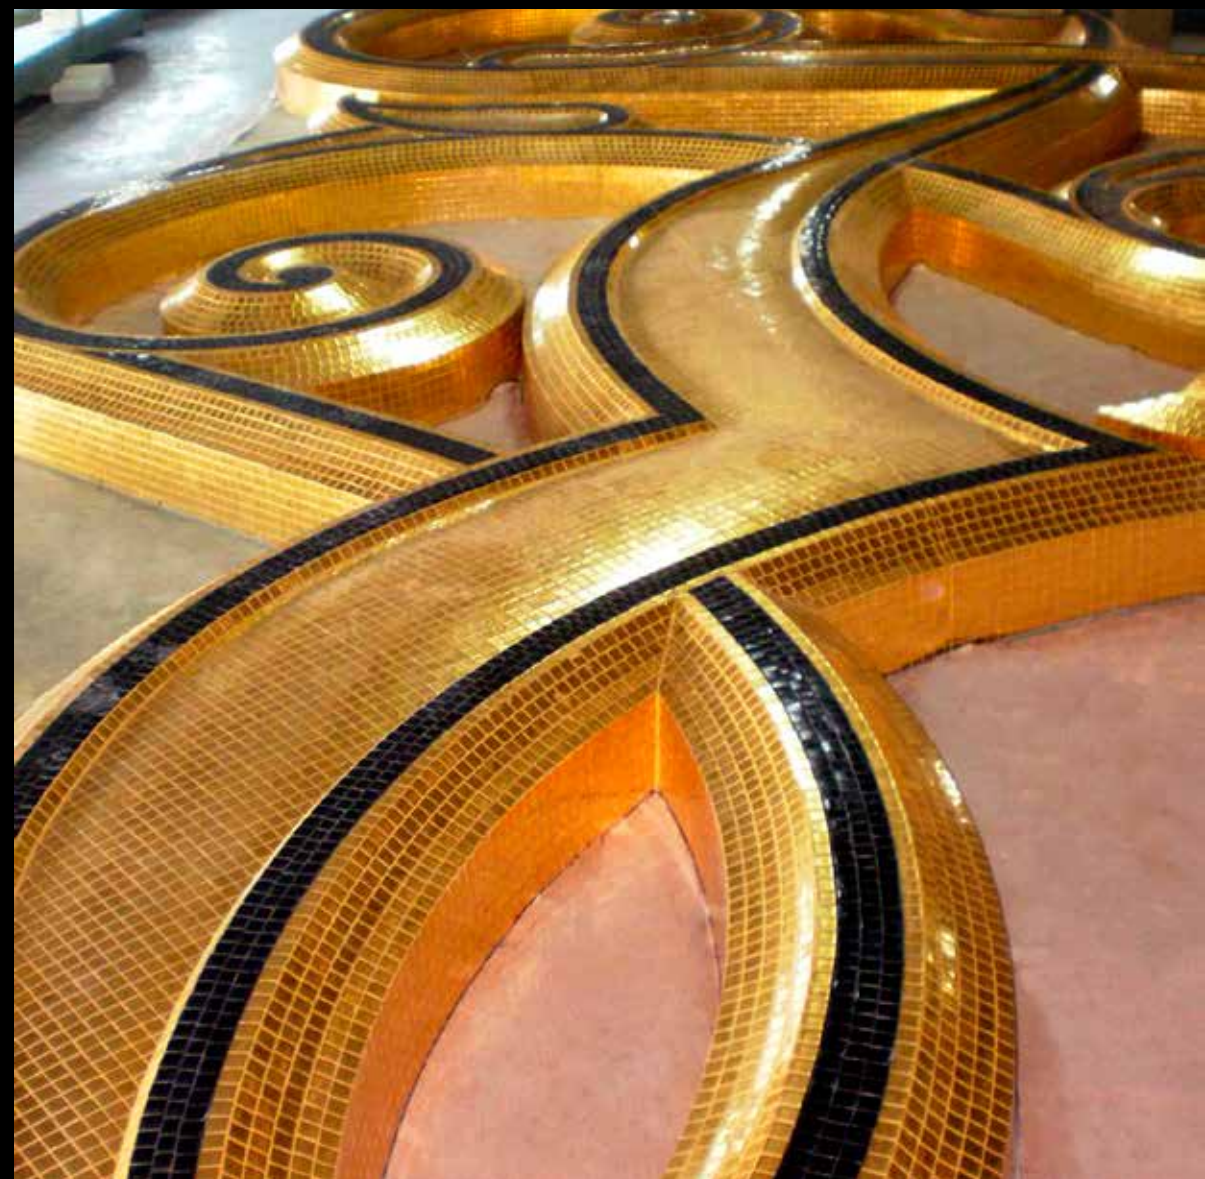

To supply such a significant amount of high quality gold leaf mosaic, TREND had to resort to a fully mechanized production line.

The background is a dense, golden mosaic of small, square tiles. A grid of thin, dark lines separates the tiles. In the center of the image, there is a glowing, ethereal orb or sphere with a textured, crystalline surface, emitting a bright, golden light that illuminates the surrounding tiles.

The Golden Elephant
Zoo Miami, FL, USA

It took 12 mosaic artists more than a year to create the stunning figure weighing 1.3 tons (2,710 lbs.) and measuring 2,13 m (7 ft.) wide, 4,9 m (16 ft.) high and 8,2 m (27 ft.) long.

In celebration of Endangered Species Day and to raise awareness about the importance of protecting endangered species and their habitats, TREND Group made its donation of a life-size gold mosaic elephant figure valued at \$100K to Zoo Miami Foundation.
